

Antenna Measurement Short Course

Acquire Advanced Theoretical Knowledge in Antenna Measurement in 3 days

The course is an intensive 3 day study on state-of-the-art near and far-field antenna measurement techniques. It is a synopsis of our complete course which takes place in Europe and where courses and hands-on workshops come together to allow participants to put newly acquired theory into practice and gain insight into multiple aspects of practical antenna measurement.

- 1 Introduction to Antenna Theory
- 2 Near and Far-field Measurement

Who should attend?

The course is intended for PhD students, engineers, scientists, engineering managers and practicing antenna measurement technicians who need to thoroughly understand and practice the theory and principles of antenna measurement techniques.

Teachers

- Manuel Sierra Castañer, Dr., Assoc.Prof, UPM, Universidad Politécnica de Madrid
- Jiaying Zhang, Microwave Vision, Asia-Pacific
- Lars Jacob Foged, Microwave Vision Italy
- Giuseppe Vecchi, Politecnico de Torino

Date and Location

August 27-29 Tongji University Shanghai, China
or September 1-3 - Beijing Jiaotong University
Beijing, China

Prerequisite

Basic antenna knowledge

Course Coordinators

- Dr. Manuel Sierra Castañer, Universidad Politécnica de Madrid (UPM), m.sierra.castaner@gr.ssr.upm.es
- Lars Jacob Foged, MVG Italy lfoged@satimo.com

Registration Fees*

- Non-profit institutions: 120 €
- For-profit institutions: 400 €
- Fee waiver for Tongji and Jiaotong University students

Maximum capacity

- 50 students

REGISTER AT:

<http://www.antennasvce.org/Community/Education/Courses>

Event coordinators:

Shanghai: Jean Yu yu@tongji.edu.cn
Beijing: Yanping Shen yps@bjtu.edu.cn

* Accommodations are NOT included. Recommendations will be provided.

SHANGHAI
September 1-3, 2014
 at Shanghai Tongji
 University 1239
 Siping Road,
 Shanghai, China

BEIJING
August 27-29, 2014
 at Main campus, Beijing
 Jiaotong University
 No.3 Shangyuancun,
 Haidian District
 Beijing 100044, China
